About us

S-comfort Seating systems has always been a leading manufacturer, supplier and exporter of various types of seating systems and other furniture. Be it office chairs, executive desks, meeting tables or classroom tables in Pune, we have always maintained quality and delivered the best possible service to all our valued clients. The guidelines followed by us are quite strict during the process of manufacturing which are laid by the TQM system. In the last few years we have achieved an outstanding position in the domestic market by offering high quality seating systems. The materials used in our seating systems are of high quality which we buy from reliable vendors.

Application Area

Great ambience is prerequisite in any industry, as it is prime mood setter. This coupled with the class of creativity which we offer has propelled us in diverse industries such as:

- Schools • Colleges • Organizations • Corporate Offices • Hospitals • Coffee Shops • Hotels • Canteens • Auditorium

Vision

Vision can be of one man's brainchild, but that vision cannot be realized if it is not nurtured and nourished by equally qualified people. We have build our expert team very carefully as we know it is the team which is going to shape the future. Fired with same passion of creativity, we have people of following fields with whom we are sharing our ideas.

- Designers • Engineers • Quality controllers • Research analysts • Warehouse in charges
- Packaging experts • Interior Decorators • Architects • Market representatives

They work in tandem, have brainstorming sessions and come up with unique ideas. Constant innovation is the sole pusher for them. It's their extra ordinary skills and ability which has made us formidable name in the furniture industry.

Application Area

Warehousing is particularly important for post sale safety of material. Thus we have created well maintained and capacious warehouse. It is been taken care by dedicated security personnel. Customers can rely on us if they have no immediate facility of storage. We believe in giving end to end solutions. After creating fine designs we take full responsibility of transportation. We give excellent packaging service and deliver the material at your place on right time. We are equipped with the staff which is more than capable of doing this job.

Quality Assurance

The only criterion which decides worth of your work is quality and not quantity. But quality is not benchmark but a working and foundation principle for us. The most important phase in our work system is quality control. Each and every step, including procuring raw materials, concepts, designing, finishing and polishing is performed under the watchful eyes of experts and experienced professionals. This neurotic insistence on quality is what differentiates us From others and the reason why we are able to make sturdy yet elegant styles:

- Finishing • Strength • Usability • Reliability • Durability

Research & Development

Innovation is not possible without research and innovation is what we value the highest. To get that constant stimulus of novelty we have separate and dedicated team for R&D work. The experts with encyclopedic knowledge devote themselves to come up with new techniques, methodologies and processes. This makes us aware about the new happenings around us. Plus, this helps in optimum utilization of resources, minimization of wastage and streamlining the entire process. They even conduct market research which is a key to know the customer requirements as well as what are current trends, which thing is in and which is out. This is the womb through which creativity comes out.
